ALI GHAITHAN

ENTRY-LEVEL DATA ANALYST | PYTHON • SQL • EXCEL • POWER BI

Aden, Yemen | Email: ghaithan61@gmail.com | Phone: +967774361170

Portfolio: mfcbfuimikanta-tech.github.io/my-portfolio | GitHub: github.com/mfcbfuimikanta-tech

PROFESSIONAL SUMMARY

Entry-level data analyst with hands-on portfolio experience in Python (Pandas), SQL, Excel, and data visualization. Skilled in inspecting, cleaning, joining, and summarizing datasets to answer practical questions. Developed and published a loan-risk case study with a reproducible analysis workflow and interactive dashboard. Seeking a junior data analyst, reporting, or data management opportunity.

TECHNICAL SKILLS

Python / Pandas: CSV import, DataFrames, missing-value checks, duplicates, merging, grouping, descriptive analysis

SQL / MySQL: SELECT, WHERE, JOIN, GROUP BY, CASE, aggregations, data validation

Excel: Data cleaning, sorting, filtering, formulas, PivotTables, summary reporting

Reporting & BI: KPIs, dashboards, chart interpretation, project documentation; developing Power BI skills

PORTFOLIO PROJECTS

Loan Default Risk Analysis | *Python, Pandas, MySQL, interactive dashboard*

- Combined loan application and borrower-profile information using borrower_id; checked duplicate IDs, missing data, and join consistency.
- Explored 460 synthetic loan applications, including 78 observed defaults (16.96%), to compare default patterns by credit score, debt-to-income ratio, loan purpose, and employment tenure.
- Documented analysis steps, SQL queries, visualizations, and limitations in a portfolio case study; distinguished descriptive trends from real-world lending recommendations.

Case study: View portfolio project

Data Analyst Portfolio Website | *GitHub Pages, HTML, CSS, JavaScript*

- Published a responsive portfolio website highlighting analytical methods, project visuals, interactive examples, and a documented case study.

EDUCATION

General Secondary Education Certificate — Scientific Stream

Hamed Khalifa Secondary School, Yemen | Academic year 2020–2021
